

SUBCHAPTER C : MUNICIPAL SOLID WASTE COLLECTION AND TRANSPORTATION

§330.31. Applicability.

This subchapter shall be applicable to all public and private collection and transportation systems.

§330.32. Collection and Transportation Requirements.

(a) Municipal solid waste containing putrescibles shall be collected a minimum of once weekly to prevent propagation and attraction of vectors and the creation of public health nuisances. Collection should be made more frequently in circumstances where vector breeding or harborage potential is significant.

(b) Transporters of municipal solid waste shall be responsible for ensuring all solid waste they collect is unloaded only at facilities authorized to accept the type of waste being transported. Off-loading at an unauthorized location or at a facility not authorized to accept such waste is a violation of this subchapter. Allowable wastes at a particular solid waste management facility may be determined by reviewing the following regulations as applicable:

(1) Section 330.41 of this title (relating to Types of Municipal Solid Waste Facilities);

(2) Sections 330.111-330.134 of this title (relating to Operational Standards for Solid Waste Land Disposal Sites);

(3) Sections 330.150-330.159 of this title (relating to Operational Standards for Solid Waste Processing and Experimental Sites);

(4) Sections 312.1-312.101 of this title (relating to Sewage Sludge Use and Disposal);
and

(5) Section 330.5(e) of this title (relating to General Prohibitions).

(c) All transporters of solid waste shall maintain records for at least three years to document that waste was taken to an authorized municipal solid waste facility. Upon request of the executive director or of a local government with jurisdiction, a transporter is responsible for providing adequate documentation regarding the destination of all collected waste including billing documents to prove that the proper disposal procedure is being followed.

(d) Each transporter delivering waste to a solid waste management facility shall provide documentation to the operator that he has so arranged his routes to eliminate nonallowable wastes from the loads he transports to that facility. This documentation shall also state that the transporter will remove any nonallowable wastes disposed of by him immediately after their discharge or that, at the

option of the disposal facility operator, he will pay any applicable surcharges to have the disposal facility operator accomplish the required immediate removal for him.

(e) At any time that nonallowable wastes are discovered in a load of waste being discharged at a municipal solid waste facility, the transporter shall immediately take all necessary steps to determine the origin and alter his routes to assure that in the future such wastes are either not collected by him or are taken to a facility approved to accept such wastes.

(f) Each transporter of waste in enclosed containers or enclosed vehicles to a Type IV municipal solid waste landfill facility (MSWLF) facility shall obtain a route special permit for each such route he proposes to take to a Type IV landfill. For the purposes of this subsection, route refers to those business establishments from which the transporter has contracted to collect waste. The application for a transporter route special permit shall be submitted to the executive director on a form provided by the commission and shall include all information requested thereon and any additional information considered necessary by the applicant or additional information as may be requested by the commission.

(1) The application for a transporter route special permit shall include the following information:

(A) the applicant name, company name, mailing address, street address, city, state, ZIP code, name and title of the contact person, and telephone number for the transporter;

(B) the name, permit number, mailing address, street address, city, state, ZIP code, name and title of a contact person, and telephone number for the receiving MSWLF facility;

(C) information on the hauling vehicle, which shall include as a minimum the license number, vehicle identification number, year model, make, capacity of vehicle in cubic yards, and rated compaction capability in pounds per cubic yard;

(D) route information, which shall include as a minimum the collection frequency, the day of the week the route is to be collected, and the day and time span within which the route is to arrive at the landfill;

(E) business establishment information, which shall be provided for each establishment on a separate form provided by the executive director, or a computer facsimile thereof, and shall include as a minimum: route order, transporter name, collection frequency, the expected day and time of collection, establishment contact person, establishment name, establishment mailing address, establishment street address, city, state, ZIP code, telephone number, a description of activities associated with the establishment with particular emphasis on food handling and products sold or handled that could end up in the waste stream; and

(F) an alternate contingency disposal plan to include alternate trucks to be used or alternate disposal facilities.

(2) The application at the time of submittal must be accompanied by the required \$100 application fee.

(3) A maintenance fee of \$100 for each transporter route special permit will be due every three months following the date of issuance. Failure to submit timely payment of the maintenance fee eliminates the option of disposal of these wastes at a Type IV landfill until the fee is paid.

(4) This subsection does not apply if the waste load is from a single collection point that is a stationary compactor permitted in accordance with §330.25 of this title (relating to Requirements for Stationary Compactors) or municipal vehicles permitted under subsection (g) of this section.

(5) Each transporter delivering waste to a Type IV landfill in accordance with this subsection shall provide to the on-site commission inspector a trip ticket in the typical form provided by the commission prior to discharging his load.

(g) Special residential and municipal collection routes where enclosed containers or enclosed vehicles are used to collect and transport brush or construction-demolition wastes and rubbish to Type IV landfills shall obtain a special permit for each municipal route he proposes to take to the Type IV landfill. Disposal of household waste is prohibited in Type IV facilities. For the purposes of this subsection, route refers to those residences from which the transporter has contracted to collect brush or construction-demolition waste and rubbish. The application for a municipal route special permit shall be submitted to the executive director on a form provided by the commission for each truck or container to be used and shall include all information requested thereon and any additional information considered necessary by the applicant or additional information as may be requested by the executive director.

(1) The application for a municipal route special permit shall include the following information:

(A) the applicant name, title, mailing address, street address, city, state, ZIP code, name and title of a contact person, and telephone number for the transporter;

(B) the name, permit number, mailing address, street address, city, state, ZIP code, name and title of a contact person, and telephone number for the receiving MSWLF facility;

(C) information on the hauling vehicle, which shall include as a minimum the license number, vehicle identification number, year model, make, capacity of vehicle in cubic yards, and rated compaction capability in pounds per cubic yard;

(D) route information, which shall include as a minimum the collection frequency, the day of the week the route is to be collected, and the day and time span within which the route is to arrive at the landfill;

(E) a description of the wastes to be transported;

(F) a signed and notarized certificate from the city that states: I [name] _____, [title] _____, of the City of _____ in _____ County, certify that the contents of the vehicle described above will not enter a Type IV landfill unless it is free of putrescible, household, hazardous, Class I industrial nonhazardous, infectious, or any other waste not allowable in a Type IV landfill.

(2) The application at the time of submittal must be accompanied by the required \$50 application fee.

(3) Each municipal route must be documented by a trip ticket in the typical form provided by the executive director that is provided to the landfill operator prior to discharging the load at the landfill.

(4) A municipal route special permit shall be issued for one year and must be renewed annually prior to the date of expiration by submitting a renewal fee in the amount of \$50. Failure to submit timely payment of the renewal fee eliminates the option of disposal of these wastes at a Type IV landfill until a new or renewed special permit is issued.

(h) Change requirements for transporter route or special municipal route special permits are as follows.

(1) A change of a transporter route special permit or municipal route special permit must be submitted any time any information within the original application is to be changed, including the list of establishments for a transporter route.

(2) An application to change an existing transporter route special permit or municipal route special permit must include all of the same documentation required of an original application.

§330.33. Collection Vehicles and Equipment.

(a) Sanitation standards. All vehicles and equipment used for the collection and transportation of municipal solid waste shall be constructed, operated, and maintained to prevent loss of liquid or solid waste material and to minimize health and safety hazards to solid waste management personnel, the public, and the environment. Collection vehicles and equipment shall be maintained in a sanitary condition to preclude odors and fly breeding.

(b) Operating condition of vehicles. Collection vehicles should be maintained and serviced periodically and should receive periodic safety checks. Safety defects in a vehicle should be repaired before the vehicle is used.

§330.34. Collection Spillage.

(a) Cleanup at collection point. The person operating the collection system shall provide for prompt cleanup of all spillages caused by the collection operation.

(b) Cleanup along route. Persons transporting solid waste shall not discharge or allow the discharge of solid waste from the vehicle on the way to the municipal solid waste facility. If a discharge of waste occurs during transportation, the transporter shall take immediate action to contain the waste and to clean up and remove the discharged waste to an approved solid waste management facility.
